2017: MSc in Mechanical Engineering at Nova School of Science and Technology

2008: First Certificate in English at Cambridge School

About

Having always been fascinated by technology and curious about how everything works, she pursued a Master degree in Mechanical Engineering. This background allowed her to gain experience with a chain of processes from product conception, to design and production, which has given her a broad understanding of the various phases of project development. More recently, given the uprise of Digital Transformation and the increasing potential of web-based services, she decided to specialize in OutSystems

Experience
